

Dear Architecture Freshers,

Congratulations on getting into the both the best course and best college at Cambridge!

Though it is tonnes of fun, the work can get quite intense, so make the most of your free time and try to relax before you arrive!

The studio community is very close and you'll likely find yourself with great friends from both college and the department! Not to mention you'll have the amazing Dr. Max Sternberg as your DoS (tall, smart, German and incredibly helpful), however I think he might be on paternity leave when you arrive.

As an architect you'll likely be deeply involved in the Architecture Society (Arcsoc) which is one of the most fun and cool societies in Cambridge. We throw parties and various exciting events, talks and film screenings etc., and at the end of the year there's an exhibition in London.

Hopefully this message has got you simultaneously clued up and pumped for the year ahead! I'm sure you will have loads of questions, feel free to send any my way, my name is Aman and I am your subject officer, and you can get a hold of me at [as2573@cam.ac.uk](mailto:as2573@cam.ac.uk). The other lovely architecture undergrads in college are Hannah, Shirley and Antonia.
